

How to install your new AppCreatorPro app on your phone

1. **iPhone** – Just touch the share box with arrow at the bottom of the screen and confirm “Add to Homescreen.”

2. **Android** – Just tap the menu in the upper right of the browser (three dots) and select “Bookmark,” and then, in the “Save to” drop down menu, select Homescreen.

(For older Android devices, first, “Bookmark” the app. Once you have bookmarked the app, go to the homescreen and hold your thumb down where you want to install the app until the menu appears. Select “Shortcut” and then “Bookmark” (or “App Actions”). When the bookmark list appears, select the app bookmark and the homescreen icon will install.)

3. **Blackberry** – With the app open in the browser, hit the menu button (looks like a bunch of dots), then click on add to home screen. Tested on Blackberry Torch and Curve models.
